CONNECTOR POSITION

The I/O option card is an extremely economical way of operating servo controllers under position control for simple automation tasks.

14 additional digital inputs permit the selection and start of the motion tasks that are stored in the motion-task memory of the SERVOSTAR® 600. All the important functions for the position controller that is integrated into the servo controller can thus be operated from a small, independent control system.

8 digital outputs report the status of the drive to the higher-level control.

DIMENSIONS/ORDERING INFORMATIONsales@servo2go.com
www.servo2go.com**Resistive Regeneration Sizing**

Shunt regeneration is required to dissipate energy that is pumped back into the DC bus during load deceleration. The amount of shunt regeneration required is a function of the sum of simultaneously decelerating loads. The loads need to be defined in terms of system inertia, maximum speed, and deceleration time. In addition, the duty cycle must be known. Application Note AS6000H details a calculation method to determine proper regeneration sizing.

Kollmorgen GOLDLINE BH/MH

INTRODUCTION

Kollmorgen GOLDLINE™ BH/MH Series

- 0.52 to 69 lb-ft (0.7 to 93 N-m)
- 70.0 to 190 mm (2.76 to 7.5 inches) Square Frame
- Resolver Feedback
- Speeds up to 7500 RPM
- 400/480 VAC, 565/680 VDC bus rated

Kollmogen **GOLDLINE BH/MH** servomotors build on the tradition of high performance motors from Kollmogen. Designed around the classic industry-standard Kollmogen **GOLDLINE** series, the **BH/MH** motors incorporate the highest energy rare earth neodymium-iron-boron magnets and excellent thermal design to provide exceptional continuous torque and peak torque performance in a compact package.

The servomotors incorporate the patented IPM (Interior Permanent Magnet) design technology which results in superior torque to inertia and torque per volume ratios.

The **BH/MH** line of servomotors is available in 5 frame sizes and 3 stack lengths per frame. With multiple windings per stack, the **BH/MH** series meet the needs of a wide range of applications.

BH-Series (low inertia)

The **BH-Series** provides extremely low inertia rotors allowing optimum performance in applications requiring rapid acceleration and deceleration. The IPM magnetic design provides for very high torque density and torque/inertia ratios. When used with the SERVOSTAR® 600 family of amplifiers, the resulting speed/torque is the widest range in the industry.

MH-Series (medium inertia)

The **MH-Series** is an extension of the **BH-Series**. With seven times higher inertia, this motor series offers the advantage of better performance for systems having compliant loads or larger inertia mismatches.

FEATURES: BH or MH Series

- Compact (high torque/volume ratio)
- Speeds to 7500 RPM standard
- IPM (Interior Permanent Magnet) design for low cogging
- CE Compliant, UL recognition
- Rugged resolver feedback
- Built-in thermostat
- Rear shaft extension for mounting additional feedback devices
- Class H insulation system
- Rotatable CE connectors standard on 12x, 22x, 42x
- Terminal Box standard on 62x and 82x frames

OPTIONS:

- IP65 and IP67 sealing
- Fail-safe brake, 24 and 90VDC
- NEMA and Metric mountings
- Standard SERVOSTAR 600 UL/CE cable assemblies available in 3 meter increments

MOTOR RATINGS

The motors performance capacity depends on the ability to get rid of the heat generated within the motor package. The ratings on the following pages assume that the motor is mounted to a metal mounting bracket capable of drawing heat energy away. The ratings assume the following:

- a.) For BH12x and BH22x: Continuous Duty Ratings are for a motor mounted to a 1/4 inch thick aluminum faceplate of 96 square inches.
 - b.) For the BH42x, BH62x, and BH82x: Continuous Duty Ratings are for a motor mounted to a 1 inch thick aluminum faceplate plate of 452 square inches.
 - c.) Ambient temperature is 40° C (or less)
- Equivalent thermal masses and radiating surface areas are a common part of classical machine design. Other applications require derating.
